Phone: 7483569827

OBJECTIVE

Aspiring Software and Data Professional with skills in Python, SQL, Web Development, and Data Analytics.

Eager to contribute to innovative projects, enhance technical expertise, and deliver efficient solutions in a growth-oriented organization .

EDUCATION

B.E. in Electronics and Communication Engineering

PDA College of Engineering, Kalaburagi (Autonomous, Affiliated to VTU)

2021 – 2025 | CGPA: 7.09

PUC (Pre-University)

Disha Pu College, Kalaburagi

2019 – 2021 | Percentage: 89.3%

SSLC (Class 10)

HKE Society's High School Rudrawadi, TQ:ALAND, Dist. Kalaburagi

2019 | Percentage: 89.96%

TECHNICAL SKILLS

- Programming Language : Python, SQL(Oracle), JavaScript(basic)
 - Web Technologies &Framework :HTML,CSS, Django
 - Software Engineering Concepts : Object-Oriented Programming(Python)
 - Databases : Oracle SQL,CRUD Operations, Joins
 - Data Analysis: , NumPy, Pandas, Matplotlib, Seaborn, Data Cleaning, Data Visualization,Excel,PoweBI
-

INTERSHIPS AND TRAINING

1. Internship – QSpiders (Test Yantra software solutions) |Aug 2025 – Nov 2025

- Technologies used –HTML, CSS, JavaScript.
- Developed responsive frontend pages an e-commerce website.
- Worked Under mentor Guidance during internship to meet project requirements

2.Internship - GTTC, Automation & IOT | Nov 2023-Jan 2024

- **Smoke Detector:** I developed a smoke detector using an MQ-2 sensor to detect smoke particles in the air. The sensor triggers an alarm when smoke is detected, alerting people to the case of a fire. This project focuses on early fire detection and safety.

Training: Python Full Stack Development with Data Analytics |Aug 2025-April2026

- Qspiders, Bangalore
-

PROJECTS

1. LPG Gas Detector:

- I implemented an LPG gas detection system using Arduino UNO and MQ-6 sensor.
- The system detects gas leaks and can trigger alerts or safety measures.
- This project aims to prevent accidents and ensure safety in environments with LPG usage.

2. Accident Detection and Alert System using Embedded:

- I implemented an Accident Detection and Alert System using embedded systems, integrating sensors and microcontrollers to detect accidents and send alerts.
 - The system uses GPS and GSM modules to notify authorities or emergency contacts with location information, enabling timely response and assistance.
 - This project aims to enhance road safety and reduce response times in critical situations
-

CERTIFICATIONS

- **Automation and IOT Certification** – GTTC
 - **Front-end Development** – QSpiders (Test Yantra software solutions)
 - **Life Skills Certification** – Wadhwani Foundations
 - **Python Full Stack Certification**-Pyspiders(Python Training Institute)
-

SOFT SKILLS

- Results-driven
- Collaborative
- Adaptable
- Strategic thinker
